THE UNITED STRAILES OF ANTERIOA

TO ALL TO WHOM: THESE: PRESENTS: SHALL COME;

Nickerson American Plant Breeders, Inc.

Colhereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY, AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF eighteen years from the date of this grant, subject to the payment of the required fees and periodic replenishment of viable basic seed of the variety in a public repository as provided by LAW, the right to exclude others from selling the variety, or offering it for sale, or reproducing it, importing it, or exporting it, or using it in producing a hybrid or different ety therefrom, to the extent provided by the Plant Variety Protection Act. United States seed of this variety (1) shall be sold by variety name only as of certified seed and (2) shall conform to the number of generations by the owner of the rights. (84 stat. 1542, as amended, 7 u.s.c. 2321 et seq.)

BARLEY

'Teton'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Bariety Exotection Office to be affixed at the City of Washington, D.C. this 28th day of February in the year of our Lord one thousand nine

hundred and eighty-six.

Helling willing & Styleton

Attest:

Lenseth N. Eva Commissioner

INSTRUCTIONS

GENERAL: Send an original copy of the application and exhibits, at least 2,500 viable seeds, and \$500 fee (\$250 filing fee and \$250 examination fee) to U.S. Dept. of Agriculture, Agricultural Marketing Service, Livestock, Poultry, Grain and Seed Division, Plant Variety Protection Office, National Agricultural Library Building, Beltsville, Maryland 20705. (See section 180.175 of the Regulations and Rules of Practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- Give the date the applicant determined that he had a new variety based on (1) the definition in section 41(a) of the Act and (2) the date a decision was made to increase the seed.
- Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method; (2) the details of subsequent stages of selection and multiplication; (3) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified and (4) evidence of uniformity and stability.
- Give a summary statement of the variety's novelty. Clearly state how this novel variety may be distinguished from all other varieties in the same crop. If the new variety most closely resembles one or a group of related varieties:

 (1) identify these varieties and state all differences objectively; (2) attach statistical data for characters expressed numerically and demonstrate that these differences are significant; and (3) submit, if helpful, seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty.
- 13c Fill in the Exhibit C, Objective Description form, for all characteristics for which you have adequate data.
- Describe any additional characteristics that are not described, or whose description cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the description of characteristics that are difficult to describe, such as, plant habit, plant color, disease resistance, etc.
- 14a If "YES" is specified (seed of this variety be sold by variety name only as a class of certified seed) the applicant may NOT reverse his affirmative decision after the variety has either been sold and so labeled, his decision published, or the certificate has been issued. However, if the applicant specified "NO," he may change his choice. (See section 180.16 of the Regulations and Rules of Practice.)
- See section 42 of the Plant Variety Protection Act and section 180.7 of the Regulations and Rules of Practice.

Exhibit A.

Origin and breeding history of Teton (6B76-181A; NAPB-9; Teton)

Pedigree: Steptoe/63Ab 2987

Date of Cross: The cross was made in the fall 1973 greenhouse; the Fl was grown in the spring 1974 greenhouse to produce F2 seed. 63Ab 2987 was a bulk of 120 lines from the cross Traill/CI 7147//Traill and was from the U.S.D.A. barley breeding program at Aberdeen, Idaho. CI 7147 is from the cross Delta/Everest.

"History: F2 plants were grown at Great Falls, Montana; Berthoud, Colorado; and Lethbridge, Alberta, Canada (dryland) in 1974. Single plant selections were advanced to F3 plots and grown at Great Falls, Montana in 1975. The F4 bulk was yield tested in 1976 at Berthoud, Colorado and five single plants were selected for winter increase as F5 plant selections in Christchurch, New Zealand during the 1976-77 off-season. In 1977 the original seed tracing to the F4 bulk was yield tested as an F5 bulk at Berthoud, Colorado; Great Falls, Montana; and Twin Falls, Idaho. In addition, the five subfamilies tracing to single plant F5 selections were yield tested as F6 bulks in Berthoud, Colorado. From the five lines, subfamily A was chosen to continue with and the line designation of 6B76-181A was used. This line served as the pure seed and yield trial source in 1978. This line has been tested by NAPB in Berthoud, Colorado from 1978 to 1982. It was also tested in Twin Falls and Nampa, Idaho trials in 1979 and 1980, respectively. 6B76-181A was entered as NAPB-9 in Intermountain barley testing programs in 1980. NAPB-9 has been tested in Colorado, Wyoming, Montana, Idaho, Washington, and It is also currently (1982) being tested in the six-rowed Canadian Co-op Trials.

Purification was initiated in 1977. Two hundred plants were selected from 6B76-181A (subfamily A). These were grown at our Berthoud, Colorado location and 32 rows were discarded. A headrow from each of the remaining 168 plant selections was grown in Yuma, Arizona during the 1978-79 winter season. Several headrows were discarded at the Yuma, Arizona nursery and a head-row from each row was grown at Berthoud, Colorado in 1979. The seed produced in 1978 and 1979 was bulked and planted in Yuma, Arizona to produce the original breeder seed.

Two hundred ninety-two head-rows from this breeder seed were also grown in 1980 to constitute breeder seed, and future head-rows will be grown as necessary to produce breeder seed. Breeder and Foundation seed fields were stable and uniform in 1982. It may be noted that throughout the production stages of this variety, a .6% blue aleurone color has been recorded. This trait is to be expected in subsequent generations.

Exhibit B

Novelty Statement

Teton is most similar to the spring barley variety Steptoe, however it can be distinguished by the following morphological characteristics:

- Teton's leaves are slightly waxey. Steptoe's leaves are non-waxey. (NAPB Inc. morphological data).
- Teton has few teeth or barbs on the lateral and marginal nerves. Steptoe has numerous teeth/barbs on the lateral nerves.
- Teton's rachis is covered with hairs. Steptoe has few hairs on the edge of its rachis. (Exhibit C; Washington State Exp. Station, 1973).
- Teton's glume awns are less than equal to the length of the glume. Steptoe's glume awns equal 1/2 the length of the glume. (NAPB Inc. morphological data).
- Teton's flag leaf makes a 90 degree angle from the stem at boot stage. Steptoe's flag leaf is recurved at boot stage. (NAPB Inc. morphological data).

Exhibit D

Botanical Description

Teton is a mid-tall, six rowed spring barley. It is midseason in maturity with non-malting or feed type quality.

It has a semiprostrate juvenile growth habit. The spike is lax, midlong to long with spreading, rough awns and long haired, covered nach is edges. Glume hair covering is long and covered, (some glumes display a thick band appearance). The glume awns are rough and less than equal to the glume length. Kernels exhibit white aleurone with a .6% blue aleurone mixture, and slightly wrinkled hulls. The lemma base shape is a transverse crease with few teeth on the lateral and marginal veins. Teton has been bred and developed by North American Plant Breeders.

CERTIFICATE OF AMENDMENT OF CERTIFICATE OF INCORPORATION OF AGR ACQUISITION CORPORATION

AGR Acquisition Corporation, a corporation organized and existing under and by virtue of the General Corporation Law of the State of Delaware,

DOES HEREBY CERTIFY:

FIRST: that the Board of Directors of said corporation, by the unanimous written consent of its members filed with the minutes of the Board, adopted a resolution proposing and declaring advisable the following amendment to the Certificate of Incorporation of said corporation:

RESOLVED, that the Certificate of Incorporation of this corporation be amended by changing the Article thereof numbered "ARTICLE I" so that, as amended, said Article shall be and read as follows:

"ARTICLE I

Namo

The name of the corporation (hereinafter called the 'Corporation') is Agripro Seeds, Inc."

SECOND: That in lieu of a meeting and vote of stockholders, the sole shareholder of the corporation has given unanimous written consent to said amendment in accordance with the provisions of Section 228 of the General Corporation Law of the State of Delaware.

THIRD: That the aforesaid amendment was duly adopted in accordance with the applicable provisions of Sections 242 and 228 of the General Corporation Law of the State of Delaware.

FOURTH: That the capital of said corporation shall not be reduced under or by reason of said amendment.

IN WITNESS WHEREOF, said AGR Acquisition Corporation has caused this certificate to be signed by Gary T. Hancock, its President, and attested by Ann Steelman, its Secretary, this 30 day of June, 1994.
